1. Claims 1-11 are pending and are subject to restriction/election.
2. A telephone call was made to Attorney JiaWei Huang on February 17, 2006 to attempt to request an oral election to the above restriction requirement, but did not result in an election being made.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 6 and 8, drawn to a reflector of a selected color selected from among a plurality of colors, in an optical scan module.
 - II. Claims 2, 3, 4, 7, 9, and 10, drawn to lens treatment for a lens of a specific color, or a lens of a specific color selected from among a plurality of colors, in an optical scan module.
 - III. Claims 5 and 11, drawn to replacing a light source with an adjusted light source, or to a selected light source of a specific color selected from among a plurality of colors, in an optical scan module.

The inventions are independent or distinct, each from the other because:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombinations II and III have separate utilities such as in an optical scan module that does not require a

reflector of a selected color selected among a plurality of colors, subcombinations I and III have separate utilities such as in an optical scan module that does not require lens treatment applied to a lens of the optical scan module or a lens of a specific color selected from among a plurality of colors, and subcombinations I and II have separate utilities such as in an optical scan module that does not require either a replaced light source replaced with an adjusted light source, or a light source of a specific color selected from among a plurality of colors. See MPEP§806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
